Office Action Summary	Application No. 10/616,840	Applicant(s) MIAO, GEORGE J.	
	Examiner Teskaldet Bocure	Art Unit 2611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-20 are pending in the Application.

Specification

2. The abstract of the disclosure is objected to because the title in the Abstract of the Disclosure should be deleted. . Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Molisch et al., Molisch hereinafter (US patent Publication Number 2004/0198260)

Molisch teaches a UWB communication system for use both indoor and outdoor having a corresponding power spectral density (see col. [0009]) having a means for shaping the signal spectrum of the received sign (see equalizer 301 in fig. 3) comprising an equalizer for compensating an amplitude fluctuation induced by the channel.

Even though Molisch shows a single equalizer as oppose to separate equalizer claimed indoor and outdoor filters in claim 16, using the single equalizer to compensate

Art Unit: 2611

the amplitude distortion of the received indoor and outdoor signals would occupy less space and less complexity.

Therefore, it would have been obvious to one of ordinary skill in the art to use a single equalizer to compensate the amplitude distortion in both the indoor and outdoor at the time the invention was made.

Further to claim 17, even though Molisch does not show that the inherent equalizer's tap as having odd taps, it would have been obvious design choice to design the equalizer of Molisch to have only odd taps at the time the invention was made.

Allowable Subject Matter

4. Claims 1-15 and 18-20 are allowed.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tesfaldet Bocure whose telephone number is (571) 272-3015. The examiner can normally be reached on Mon-Thur (7:30a-5:00p) & Mon.-Fri (7:30a-5:00p).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jayanti (Jay) Patel can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
